

Made in WA from 100% Recycled Tyres

The Throughcycle Rubber UTE Mat protects UTE trays, stabilises cargo, and reduces noise and vibration during transport. Made from high density recycled rubber and supplied in rolled sheets, it provides durable, hard wearing protection for trade, transport, and fleet applications.

- High-Density Rubber**
- Tray Protection**
- Anti-Slip Surface**
- Noise Reduction**

UTE Tray Protection

Protects alloy and steel trays from scratches, dents, and wear.

Loading and Unloading Protection

Cushions impact when placing or sliding heavy items in the tray.

Cargo Stability

Helps keep loads secure during transport and braking.

Noise and Vibration Reduction

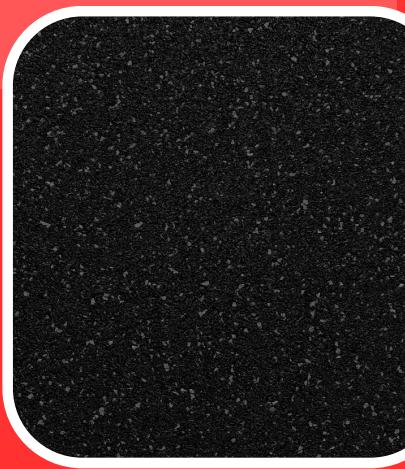

Absorbs rattling and vibration from moving loads.

Trade and Fleet Vehicles

Designed for daily use across construction, maintenance, and transport fleets.

Custom Tray Layouts

Can be shape cut to suit wheel arches and tray fit outs.

Size: 5mm thick Roll, 600mm wide x 10m long
