

Made in WA from 100% Recycled Tyres

The Throughcycle Walkway and Floor Protection Mat provides safe pedestrian access while protecting floors and ground surfaces in temporary environments. Made from recycled rubber and supplied in flexible rolls, it is quick to install, easy to reposition, and reusable, making it ideal for construction, maintenance, and fit out projects.

- ✔ Slip resistant surface
- ✔ Temporary walkway
- ✔ Surface protection
- ✔ Indoor and Outdoor

Temporary Site Access Mat

Provide safe pedestrian access across construction and maintenance sites without damaging underlying surfaces. Ideal for short-term works, service access, and controlled foot traffic.

Walkway and Pedestrian Protection

Create temporary walkways in warehouses, factories, events, or commercial spaces where slip resistance and surface protection are required.

Floor Protection Mats for Renovations

Protect tiles, timber, vinyl, and polished concrete during renovations, shop fit-outs, and building works. The mat absorbs impact, reduces scuffing, and minimises surface damage.

Size: 5mm thick Roll, 600mm wide x 10m long
